

Volunteer Connector

Charles Koll & Daniel Domme

A dark blue diagonal gradient bar that starts from the bottom left corner and extends towards the top right corner, covering the lower half of the slide.

What does it do?

- Connects volunteers with organizations that need help
- Allows people to search for events near them that they can help at
- Provides a free way for organizations to advertise that they need help

Why do we need it?

- Hard to find places nearby that need help
- Provides a centralized location for searching
- Free
- Organizations such as soup kitchens, charitable fundraisers, etc. don't easily have a way to advertise their need
